

Gamatronic unveiled the Crown Jewel in Backup Power at the Efficient Energy Summit that celebrated Gamatronic's 40th anniversary

The event took place at the Tower of London on 4 March 2010, and was attended by 200 industry leaders in the backup power supply market. It focused on new trends and innovations in efficient energy consumption, leveraging of 40 years at the forefront of developing continuous, reliable, pure power, and power-protection solutions. The Efficient Energy Summit was supported by UK Trade & Investment and the British-Israel Chamber of Commerce.

Ron Proser, Ambassador of Israel in the UK, said in his speech " I came here to use this opportunity to celebrate with the Gamatronic family your 40th year anniversary. Gamatronic as a company is a wonderful ambassador for Israel contributions, and I am not winking by saying that, in the information and communication field... "

Commenting on its decision to hold its inaugural efficient energy summit, Jayne Mansfield, co-managing director of Gamatronic Electronic Industries, said that Gamatronic's 40th anniversary was an excellent occasion to launch our inaugural Efficient Energy Summit. The event enables leading practitioners to debate the latest trends in the sector and provide an unrivalled networking opportunity. The team was also very excited about unveiling our new Modular Mega+ UPS 250KVA, which ticked all the boxes for modularity, redundancy, power density, cost reduction, high efficiency, and capacity—all bundled up into the smallest possible piece of equipment.

Mega Power+ Dedicated Technical Seminar

On March 16, the first Mega Power+ technical seminar took place in Grand Beach Hotel, alongside the Tel-Aviv seashore.

The Seminar was attended by Gamatronic partners from 16 countries: South America, Europe, the Far East, and Africa.

Mega Power+ 25-250 kVA/kW—the newest Gamatronic modular UPS: extremely small, the most highly efficient UPS was received with great excitement by our partners.

Tens of Mega Power+ systems have been supplied and installed worldwide. We see the Mega Power+ UPS system as a true revolution in middle-to-high capacity UPS products. Covering a broad range of capacities, Mega Power+ is a universal, highly reliable, minimally priced, and compact solution.
